Lamin Juwara

Personal information

Nationality Gambian

Education

2018–Present **PhD. Quantitative Life Sciences**, *McGill University*, Canada.
- Mitacs Accelerate Fellowship

2016–2018 **MSc. Biostatistics**, *McGill University*, Canada.
- MasterCard Foundation Scholar

2015–2016 **MSc. Mathematical Sciences**, *AIMS-SA, Stellenbosch University*, South Africa.
- Cum Laude
- Martin Rees Scholar

2011–2015 **BSc. Mathematics (Hons)**, *Kwame Nkrumah University of Science and Tech.*, Ghana.
- First Class Honours
- Best graduating students, Department of Mathematics.

Work Experience

04/2018 - Present **Research Assistant**, JEWISH GENERAL HOSPITAL.
- Statistical computing e.g R Package 'metalr'

2017 - 2018 **Research Assistant**, MCGILL UNIVERSITY.
- Privacy-preserving data analysis

Summer 2017 **Visiting Research Scholar**, SOUTH AFRICAN CENTRE FOR EPIDEMIOLOGICAL MODELLING AND ANALYSIS.
- Developed web based applications for HIV incidence estimation (UNAIDS project)
- Statistical Computing

2007–2008 **Medical Laboratory Technician**, MEDICAL RESEARCH COUNCIL, The Gambia.
Molecular Biology Lab:

- Genomic DNA isolation and quantification.
- PCR protocols (e.g. multiplex PCR.)
- Purification and sequencing of PCR products.
- *Analysis* of bacterial DNA *sequence data* for allelic and sequence type determination.

Miscellaneous

2013–2015 **Mathematics Tutor**, KNUST - GHANA.
International Students Association (ISA) Mathematics Tutor. KNUST

Department of Biostatistics – Mcgill University
+(1) 514 318 4637 • lamin.juwara@mail.mcgill.ca

Research Project, McGill University

Title	*Virtual Pooling as a Privacy-preserving Analysis Tool*
Supervisor(s)	Dr. Paramita Saha-Chaudhuri & Dr. Alexandra M Schmidt
Description	In this study, we explore the application of specimen pooling as a privacy-preserving tool for estimating hazard ratio (HR) of a covariate for a time to event outcome. By utilizing the equivalence between the Cox Proportional Hazards model and conditional logistic model, we estimate the HRs using only the aggregate covariates which are shown to be similar to individual level (unpooled) covariate effect estimates.

Research Project, Stellenbosch University

Title	*Reverse-engineering T-cell proliferation dynamics*
Supervisor	Dr. Wilfred Ndifon

BSc Mathematics (Hons) thesis

Title	*Representation Theory of Finite Groups*
Supervisor	Dr. Richard Kena Boadi

Computer skills

Advanced	R, PYTHON, LaTeX, MATLAB, OpenOffice, Linux, Microsoft Windows
Intermediate	HTML, Visual Basics, SPSS

Oral & Poster Presentations

10/2017	Oral Presentation at the Biostatistics seminar series
01/2018	Poster Presentation at the ISPE mid-year meeting in Toronto
03/2018	Poster Presentation at the annual EBOSS Research Day
06/2018	Poster Presentation at the Statictical Society of Canada annual meeting in Montreal

Awards/Scholarships

2016-2018	MasterCard Foundation Scholarship, McGill University
2016	The Martin Rees Scholarship, AIMS South Africa
2015-2016	African Institute for Mathematical Sciences Postgraduate Scholarship

Languages

Official	**English**	*Fluent*
Other	**Mandingo, Wollof, Arabic**
